

Please amend Claim 11 as follows:

11. (Amended.) The compositions according to claim 2 wherein said solid, insoluble particulate additives comprise organic polymer particles selected from the group consisting of acetal resin, polyamides, polyethylenes [polyethelenes], polytetrafluoroethylene, polypropylene, and polyurethane, and mixtures thereof.

In the Specification:

Page 12, line 17, delete the word "polyethelenes" and insert the word -- polyethylenes -- therefor.

REMARKS

Reconsideration of this application is respectfully requested in view of the foregoing amendments to the claims and the following remarks and in view of the attached Terminal Disclaimer.

The Examiner rejected claims 8 and 11 based on an obvious typographical error for the misspelling of the word polyethylene. Applicant has corrected this typographical error which is consistently made throughout the application. Since this is clearly an obvious typographical error, this amendment does not involve any new matter. Accordingly, it would appear that these claims are now in full compliance with 35 USC 112.

Claims 12-15, which depend on Claim 11, no longer depend on a rejected claim and accordingly themselves are now in compliance with 35 USC 112.

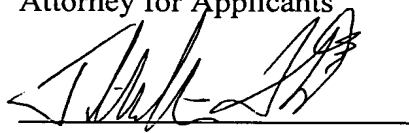

With regard to the obviousness double patenting rejection, while Applicant does not agree with the Examiner that the claims of the instant application are in fact obvious in view of the claims of the copending application, in order to expedite prosecution, a Terminal Disclaimer is enclosed with this response.

Also enclosed is an Information Disclosure Statement. Applicant requests that this Information Disclosure Statement be fully considered prior to allowance of this application.

It is contended that the instant application now is in full condition for allowance. Such action at an early date is earnestly solicited.

Respectfully submitted,

Attorney for Applicants
